

## PETITION TO PROTECT WATERFORD TOWNSHIP MN FROM HARMFUL IMPACTS OF MINERAL EXTRACTION

A new limestone mine proposed for Waterford Township will negatively impact the environment, health, and quality of life of residents in the immediate and surrounding areas.

In 2001, Waterford Township recognized the threats posed by mining and adopted a **comprehensive plan and zoning ordinance** designed to protect the community from the harmful impacts of mineral extraction. **These protections were rolled back in 2019**, however, through amendments that **broadly authorized mineral extraction** throughout most of the township — including projects that operate **below the water table, requiring constant and massive dewatering** as long as the mine is in operation.

We, the undersigned, call on the Waterford Township Board of Supervisors to **reject the application for a mineral extraction permit** by Bryan Rock Products. Further, we seek protection from future projects that threaten the environment, health, and quality of life of Waterford Township residents, land owners, and neighboring community members.
